#### **SPECIFIC COMMENTS TO AUTHORS**

The authors reported a very rare case of a scapular fracture concomitant with rotator cuff injury and glenohumeral joint subluxation. The authors have comprehensively described the case and literature review. The language quality is good. The reviewer had an only minor question on the first operation. Did the author try open-reduction the glenohumeral joint and relocation the long-head biceps in ORIF procedure? Was it possible or any rationale for better outcome treating it in second stage surgery?
