SPECIFIC COMMENTS TO AUTHORS

I have read with great interest the manuscript entitled "A rare case of drains position trocar site hernia after laparoscopic surgery and a novel strategy of prevention: A case report". The authors report of a 5 mm trocar site hernia with incarcerated small bowel. The authors also describe a technique used to close trocar site defects. Comments: 1. As far as describing hernias through trocar sites (even 5 mm) – nothing novel here. Several cases previously described. 2. Do you suggest that all 5 mm trocar sites be closed in your technique? The rate of TSH at 5 mm ports is very small. Also, how can you close the 5 mm site if there is a drain passing through it. Minor: 3. Figure 2 – please add subfigures for clarity. Gripper? – did you mean grasper or maybe grasp. Also – how do you tie the suture? Is it on top of the skin? Specify the needle size and length in Gauge and cm. 4. Abstract – the case needs to starts with the initial surgery and then continue to describe her present presentation. 5. Abstract – add the size of the trocar. 6. Abstract conclusions – "vision", not "version" 7. Case report – unless required by the journal the case should be described without the headlines of CC, HPI, PMH etc. 8. References – there is no space between the year and volume? 9. References – please add Zemet et al. JSLS 2018.
