#### **SPECIFIC COMMENTS TO AUTHORS**

The authors present a case of takotsubo cardiomyopathy after a bronchoscopic procedure. The case is described in a concise and informative manner. Takotsubo cardiomyopathy has only recently been recognized as a potential complication of bronchoscopy, and a detailed case description such as the one provided by the authors is of scientific interest. I would consider removing the words "myocardial work of" from the title of the manuscript, making it more concise. Gefitinib has also been recognized as a cause of cardiomyopathy - it would be of interest to describe for how long the patient had been using gefitinib before the event occurred, if it was discontinued afterwards, and if it was considered as a potential cause in the differential diagnosis. There are other reports of takotsubo cardiomyopathy associated with bronchoscopy in the literature (<https://doi.org/10.1016/j.chest.2019.08.1608> , <https://doi.org/10.1183/1393003.congress-2017.PA3803> , [https://doi.org/10.18907/jjsre.39.4\\_333](https://doi.org/10.18907/jjsre.39.4_333) ), but none are as well detailed as the current manuscript.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
