### **SPECIFIC COMMENTS TO AUTHORS**

Nice clinical case showing the value of imaging with optical coherence imaging to successfully solve a complicated case. Minor comments: -I think that in page 6 regarding treatment the authors mean “treatment decision consist of CABG or stent implantation” -Also in the same pag I think that the authors mean that “after 1 week the patient has neither recurrent angina nor difficult breathing”. Please revise -Figure 1: please indicate what TCFA stands for -Figure 2: Second image in 2d row seems to be upside down. A number (10) is upside down in the 3 figures of this row

## **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting case report about PCI of a left main AMI with typical carina shift using 3D-OCT. This manuscript is nicely structured and well written. I have no question about this manuscript.
