SPECIFIC COMMENTS TO AUTHORS

A detailing of the operative technique and the type of prosthetic material used would add to the relevance of the article.

SPECIFIC COMMENTS TO AUTHORS

Hiatal hernias (HH) are common in the elderly population and can cause gastroesophageal reflux disease and anemia, as the authors point out. This case report includes two interesting points: (1) HH occurred in a relatively young man. (2) The authors performed successful laparoscopic repair of the complete intrathoracic stomach without significant complications using a prosthetic patch in addition to Nissen fundoplication. However, I have some comments to improve the manuscript as followings: 1. The patient information still remains on the images of chest x-ray and CT scan. Although the written informed consent was obtained from the patient and the ethics committee of your institute approved this case report, the information which specified the patient (eg. patient's name) should be eliminated as possible. 2. In the conclusion section, you should briefly mention what this case report adds to the literature, not just a summary. 3. Was there any other cause of anemia? Add serum iron and ferritin levels to ensure a diagnosis of iron deficiency anemia. 4. I think it is better to discuss why HH occurred in a relatively young man. If obesity is one of the known risk factors of HH, mention it with a reference. 5. Please describe the reference to the following sentence: "However, most large Paraesophageal HH occur in elderly patients with the incidence rate of >60% above the age of 70 years and is a relatively rare condition in all types of HH." 6. In Figure 4, I guess you took a photo of the result of manometry and trimmed it. To improve the quality of the figure, I recommend you scan the result, if possible. 7. This manuscript contains some grammatical mistakes, thus, revise these errors carefully. For example, "... by the another hospital", "... demonstrated a intrathoracic gastric bubble ..." should be corrected to "... by another hospital", "... demonstrated an intrathoracic gastric bubble ...", respectively. 8. The names of medicine such as omeprazole and domperidone should not be capitalized except at the

beginning of a sentence. 9. The affiliation #3 is missing. Please, correct it.
