Good Case report. Usually during pancreatitis an pseudoaneurisma of the splenic artery occurs. That complication is not cited in the Discussion. If the author would cite about such unusual complication with a reference (1 sentence), the case report would be from my Point of view perfect and Ready for publication

Needs language polishing. Needs better representing images. Legends should be written in a better way.

In their manuscript entitled 'Embolization of Pancreatic Arteriovenous Malformation: A Case Report', yoon and colleagues found that TAE could be considered an effective treatment modality for selective cases of pancreatic AVM. This is potentially interesting study. 1. There are many spelling and grammar mistakes in the manuscript. It would be better for the author to find a native speaker or professional company to check and approve the manuscript. 2. The quality of some image editing in this manuscript is very low. 3. Some references are too old.
