#### **SPECIFIC COMMENTS TO AUTHORS**

It is a very complete article, I think the authors should offer more details in the introduction of the ST relationship and the CAH; since this patient did not present any manifestation of hyperandrogenism, with the purpose of justifying the studies looking for CAH. In relation to the bibliography, review the citations 5,6,8,10,12,13,14,18,22,26, and 28; in all there are more than 6 authors.
