SPECIFIC COMMENTS TO AUTHORS

Congratulations on good and inspiring work. It is pleasure to review high quality manuscripts. The authors have reported the role of positron emission tomography in primary carcinoma ex pleomorphic adenoma of the bronchus. I appreciate their efforts. In conclusion, manuscript is acceptable for publication.

SPECIFIC COMMENTS TO AUTHORS

I reviewed this interesting case report describing a rare lung tumor subtype and I congratulate the authors. I have some minor comments. -I would avoid the term screening next to PET as it indicates investigation for early detection. Here the disease was obvious. I would use just PET. -References need to be consistently presented both in text and in list according to journal's guidelines. Now each reference is reported differently. -The phrase 'Due to the clinically closed margin, he accepted a series of concurrent chemo-radiotherapies after surgery' needs to be amended. use 'close' instead of 'closed' and 'he was treated with concurrent chemoradiotherapy' instead of 'he accepted a series of concurrent chemo-radiotherapies' -the phrase 'PETS played an important role in both lymph nodes and distant metastasis.' is not clear. What do you mean? -Minor language editing is required
