SPECIFIC COMMENTS TO AUTHORS

The patient present an interesting case of huge indwelling colon with pus presented as acute abdomen after colectomy. However, there will several points need author to clarify:

1. Please clarify the patient past medical history. Did the patient get arrhythmia or other cardiomyopathy that may induce ischemic colitis? Did the patient get recent infectious gastroenteritis ?
2. Since the author mentioned that " the inflammatory exudate and mucus in the colon were probably not absorbed and discharged in time after the colon was closed", did the patient got chronic or intermittent abdominal pain in the follow up period?
3. Did the pathology revealed reactive lymphoid hyperplasia or crypt atrophy ?
4. It seems that the author present a case which may be diversion colitis, If so, please added in the text and keyword
5. Kindly request for reviewing the chronic complication of indwelling colon after colectomy.

SPECIFIC COMMENTS TO AUTHORS

This case report seems to be interesting. As a reviewer, I have several comments as bellow. #1 The authors had better change the number of figures in the order they appear in the text. #2 In the CT figure including 3 pictures, they should provide some detail explanations or add some arrows to make the readers understand them easily. #3 In Table 1, the authors should add some abbreviations.
