SPECIFIC COMMENTS TO AUTHORS

Alfishawy et al. provided an up-to-day overview on LTx during COVID-19 pandemic. However, so far, there have been published guidelines of few international hepatological associations regarding the effect of SARS-CoV-2 on the liver, patients with liver disease, awaiting on Ltx or being after LTx in the pandemic COVID-19 area. Those include: - European Association for the Study of the Liver (EASL) and European Society of Microbiology and Infection Diseases (ESMID). - American Association for the Study of Liver Diseases (AASLD), - International Pediatric Transplant Association (IPTA). I propose to compare these recommendations with each other. It would be essential. The Authors did not mention about pediatric population. If the aim of the paper was to provide an overview regarding only adult patients it should be stated.
