#### **SPECIFIC COMMENTS TO AUTHORS**

Firstly, an interesting manuscript on a case of mediastinum lymphangioleiomyoma associated with TSC-LAM. A few questions the author might want to consider adding to the manuscript: 1. Could there be other factors such as smoking/ excessive alcohol intake/ drug consumption that may have contributed to the disease? 2. Are there other treatment options to consider other than Sirolimus? How was this treatment chosen? 3. How are you planning to follow-up the patient? I hope these questions will further help you in the submission of your manuscript.
