SPECIFIC COMMENTS TO AUTHORS

This study discussed a very interesting topic. This study found that this approach played an important role in improving outpatient services, provided a model that is supported by relevant evidence and could continuously improve the quality of management. The manuscript is very well written, and the results can give the patients and clinicians new sights in the outpatient services. Comments 1. The manuscript requires a minor language editing. Some minor language polishing should be corrected. 2. Please add the Unit of time for Table 1 "Consultation wait time". 3. Are the column of "Very satisfied", "Satisfied", "General", "Dissatisfied", "Very dissatisfied" in tables the number of the patients? Please make a note or explain.
