#### **SPECIFIC COMMENTS TO AUTHORS**

Firstly, the authors should be congratulated for successfully managing this patient and reporting it. One of the important problems with mediastinal tumors is cardiac or pulmonary compromise during anesthesia induction. While the authors describe that they had extracorporeal support ready in the OR for any catastrophe, did they encounter any anesthesia-related problems? especially since the tumor was adherent to the superior vena cava. They can review the article "Kumar A, Persuad P, Shiwalkar N. Intraoperative Catastrophe during Benign Mediastinal Tumor Mass Excision: A Case Report. Cureus. 2019 Jun 19;11(6):e4941. doi: 10.7759/cureus.4941. PMID: 31431846; PMCID: PMC6697460" and cite it for completion purpose.
