## PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 66742

Title: Rare monolocular intrahepatic biliary cystadenoma: A case report

Reviewer's code: 05843257 Position: Peer Reviewer Academic degree: MD

**Professional title:** Doctor

Reviewer's Country/Territory: United States

Author's Country/Territory: China

Manuscript submission date: 2021-04-19

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-04-19 17:22

Reviewer performed review: 2021-04-27 13:40

**Review time:** 7 Days and 20 Hours

Scientific quality	[ ] Grade A: Excellent [Y] Grade B: Very good [ ] Grade C: Good [ ] Grade D: Fair [ ] Grade E: Do not publish
Language quality	[ ] Grade A: Priority publishing [Y] Grade B: Minor language polishing [ ] Grade C: A great deal of language polishing [ ] Grade D: Rejection
Conclusion	[ ] Accept (High priority) [ ] Accept (General priority) [ Y] Minor revision [ ] Major revision [ ] Rejection
Re-review	[Y]Yes [ ]No
Peer-reviewer statements	Peer-Review: [Y] Anonymous [ ] Onymous  Conflicts-of-Interest: [ ] Yes [Y] No

## SPECIFIC COMMENTS TO AUTHORS

The manuscript is a case report of a rare case of IBC using CEUS for its diagnosis. This is a very interesting case and the manuscript well presented the case. There are some points that the authors need to address prior to be considered for publication. Abstract: -Please change "While contrast-enhanced ultrasound (CEUS) has gained increasing popularity as an emerging imaging modality, it is considered the primary method for screening IBC due to its specificity of performance." To "Contrast-enhanced ultrasound (CEUS) has gained increasing popularity as an emerging imaging modality and it is considered the primary method for screening IBC due to its specificity of performance." Case presentation: - Laboratory examinations: Please exclude the word "slightly" from all the laboratory results, and change the word "decreasing" to decreased". - Please specify which tumor marker were considered to be in the normal range. Also, exclude the sentence in parenthesis. The tumor marker test showed apparently elevated CA19-9 (119.3 U/ml; normal range: 0-37.00 U/ml) and elevated CA50 (27.34 IU/ml; normal range: 0-25.00 IU/ml), but the rest were normal. (The normal range data are applicable to China and for reference only.) - Please change the sentences "Contrast-enhanced ultrasound (CEUS) was performed by Bracco's SonoVue contrast agent. Before CEUS, a vial of SonoVue (59 mg) was injected with 5 ml of normal saline, which was shaken evenly and then prepared in a suspension. Hepatography was conducted with a bolus injection of 2 ml each time via the cubital vein, followed by a bolus injection of 3-5 ml of 0.9% sodium chloride solution to flush the tube." to something more similar to this "CEUS was performed after a 2ml injection of the ultrasound contrast agent SonoVue (known as Lumason in the United States; Bracco, Milan, Italy) followed by a bolus injection of 5 ml of 0.9% sodium chloride solution."
