

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

**Manuscript NO:** 69737

**Title:** Disruption of sensation-dependent bladder emptying due to bladder overdistension in a complete spinal cord injury: A case report

**Reviewer's code:** 06125860

**Position:** Peer Reviewer

**Academic degree:** PhD

**Professional title:** Doctor

**Reviewer's Country/Territory:** Japan

**Author's Country/Territory:** South Korea

**Manuscript submission date:** 2021-07-10

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2021-07-12 08:56

**Reviewer performed review:** 2021-07-12 09:10

**Review time:** 1 Hour

#### **SPECIFIC COMMENTS TO AUTHORS**

This case report is summarized briefly clearly, I think that great. However, bladder overdistension is the most common cause of AD. Also, it has already been reported that a bladder fistula is constructed for the avoidance of bladder overdistension, and I think it lacks novelty.

#### **SPECIFIC COMMENTS TO AUTHORS**

In this manuscript authors presented man with spinal cord injury and disruption of sensation-dependent bladder emptying due to bladder overdistension. Case report was well written and brings new insights related to autonomic dysreflexia and incomplete SCI. I recommend manuscript acceptance
