### **SPECIFIC COMMENTS TO AUTHORS**

The authors have achieved tumor remission in a misdiagnosed case, and a report is very interesting. However, the following points must be supplemented. 1. Information on the medications prescribed for 9 days following the first surgery should be listed. Whether the drug contains factors that affect the prognosis of the patient should be determined. 2. The specific regimen of chemotherapy (EMA-CO) should be introduced. 3. The description of the adverse event is very short (only described in lines 149-150). Please specify any adverse effects. 3. In this case report, the authors tracked the B-HCG levels in the patient. The significance of such a marker level in choriocarcinoma should be discussed in detail. 4. There was no description of how to care for lung metastasis.

#### **SPECIFIC COMMENTS TO AUTHORS**

The study team reports an initially misdiagnosed case of a brain metastatic choriocarcinoma. Treatment regimens are discussed. Comments Line 81: Recommendation to shorten the content of the sentence and combine it with the preceding sentence. Figures: only some black arrows identified. line 79: Figure 1 citation should be placed in its direct context. line 149: in addition to citation 10, the original reference should be cited. line 228, should be rephrased: Pathological pictures of the patient... Grammar line 34, Childbearing: childbearing line 66, cephalgia: cephalalgia line 174, probably meant: because of its multiple clinical...
