SPECIFIC COMMENTS TO AUTHORS

1 Title. The title reflects the main subject of the manuscript. 2 Summary. The abstract reflects the work described in the manuscript. 3 Keywords reflect the focus of the manuscript. 4 The manuscript adequately describes the history, current status and importance of the clinical case. 5 The contributions of the study were related to the presence of the lesion in children under 4 years of age, warning that it can occur at different ages. 6 The manuscript interprets the findings adequately, concisely, clearly and logically. 7 The figures and tables are sufficient, of good quality and adequately illustrative of the article's content. 8 The manuscript properly cites the most recent, important and reliable references in the introduction and discussion sections.
