PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 68846

Title: Biopsy-confirmed fenofibrate-induced severe jaundice: A case report

Reviewer's code: 05910182
Position: Peer Reviewer
Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Israel

Author's Country/Territory: South Korea

Manuscript submission date: 2021-06-06

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-06-06 06:06

Reviewer performed review: 2021-06-15 04:55

Review time: 8 Days and 22 Hours

Scientific quality	[] Grade A: Excellent [] Grade B: Very good [Y] Grade C: Good [] Grade D: Fair [] Grade E: Do not publish
Language quality	[] Grade A: Priority publishing [Y] Grade B: Minor language polishing [] Grade C: A great deal of language polishing [] Grade D: Rejection
Conclusion	[] Accept (High priority) [] Accept (General priority) [] Minor revision [Y] Major revision [] Rejection
Re-review	[Y]Yes []No
Peer-reviewer statements	Peer-Review: [Y] Anonymous [] Onymous Conflicts-of-Interest: [] Yes [Y] No

SPECIFIC COMMENTS TO AUTHORS

The authors present a case report of DILI related to fenofibrate. 1. The article needs review by a native English speaker. 2. There is a need for more clinical detailsl in the case summary. What was the maximum bilirubin level? 3. In the introduction ethanol is not mentioned as a cause of DILI as well. 4. It is not clear to me why liver tests were routinely performed prior to an out patient visit. 5. It is not clear exactly when the patient developed jaundice 6. In the laboratory examination section no mention was made of factor V levels, viralcauses, ferritin or ceruloplasmin determinations. Nor were autoantibody results presented. 7. No objective determination of DILi such as a RUCAM score was included 8. In the review of the 11 cases in the NIH Hepatox site there is a high number with an elevated BMI and this is not so in the patient presented. In the discussion it would be useful to discuss further the effect of obesity- it may be bias since triglycerides are likely of be elevated in patients with the metabolic syndrome

SPECIFIC COMMENTS TO AUTHORS

The authors have responded to the comments and the manuscript is fine except for a few language issues. In order to save time I have taken the liberty of suggesting the changes required.
