

PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 69625

Title: Value of GRACE and SYNTAX scores for predicting prognosis of patients with non-ST elevation acute coronary syndrome

Reviewer's code: 06081599

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: Germany

Author's Country/Territory: China

Manuscript submission date: 2021-07-06

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-07-12 12:09

Reviewer performed review: 2021-07-23 00:55

Review time: 10 Days and 12 Hours

SPECIFIC COMMENTS TO AUTHORS

This is an interesting study of GRACE and SYNTAX scores in acute coronary syndrome. Currently, risk assessment model GRACE score is used to predict the prognosis of patients with NSTEMI-ACS. However, it does not take the results of patients' coronary angiography into consideration. The present study discussed the value of GRACE and SYNTAX scores for predicting the prognosis of patients with NSTEMI-ACS. Overall, this study is very well designed, and the results are interesting. After a minor correction, it can be accepted for publication. 1. Some minor language polishing should be revised. 2. The tables should be edited. 3. References must be formatted and updated according to the journal's guideline.
