SPECIFIC COMMENTS TO AUTHORS

1. Interesting case report. i appreciate authors for reporting this case. Please consider following changes as discussed below. 2. Please correct grammatical errors - few examples as below - Abstract - mixed aphasia of 2.5 hours duration. According to her continuous follow-up brain computed tomography (CT), we observed changes in cerebral hemorrhage - we observed changes in cerebral hemorrhage on serial monitoring of brain computed tomography (CT) Case presentation - 2 months instead of 2 mo 3. Is there any family history in particular of clotting disorders. 3. Laboratory examination - I see that hypercoagulable workup was done - please mention the results of Factor V Leiden, Prothrombin gene mutation as well as B2 glycoprotein antibodies which is done as a part of hypercoagulable workup. 4. ?Was the patient discharged on oral anticoagulation - as cerebral hemorrhage resolved. 5. Role of IVC Filter in these settings. 6. What could be the cause of Cerebral embolism and pulmonary embolism at the same time in patient without any risk factors. As this patient has Pulmonary HTN - could she have chronic PE causing pulmonary HTN.
