SPECIFIC COMMENTS TO AUTHORS

This is an interesting case report regarding multiple gastrointestinal hemangiomas. The topic is promising and the use of polidocanol has clearly increased in recent years. The whole paper (especially the abstract) should be edited for english-language usage. The aim of the study should be better explained in the introduction. Furthermore, a brief introduction on the uses of polydocanol in the control of bleeding should be added: Short-Term Results of Sclerotherapy with 3% Polidocanol Foam for Symptomatic Second- and Third-Degree Hemorrhoidal Disease. J Invest Surg. 2020 Apr 15;1-7. doi: 10.1080/08941939.2020.1745964 EndoTHEF: endo-luminal treatment of hemorrhoids with foam. Ann Colorectal Res. 2019;6(4):e86297. doi:10.5812/acr.86297 Safety and efficacy of foam sclerotherapy for treatment of low-flow vascular malformations in children. J Vasc Surg Venous Lymphat Disord. 2020 Nov;8(6):1074-1082 The description of the case is very interesting and useful for the readers (and also the figures) The use of the checklist for case reports must be specified within the manuscript Did the authors follow-up the patient even after the month described? This is a limitation The authors should add all the limitations at the end of the manuscript. Discussion should be deeply shortened

Dear Authors, Congratulations on the changes made which have greatly improved the manuscript. However, there are some points to clarify: - The whole paper (and not just the abstract) should be edited for english-language usage. Indeed, there are numerous grammatical errors and linguistic inaccuracies. Especially in the introduction. - The authors reported the ref. 7 in the text as "Pierluigi". Unfortunately it is not correct. The best way is "According to Lobascio et al." or other ways. Therefore it is necessary to modify both the sentence and to change from name (Pierluigi) to surname (Lobascio)
