#### **SPECIFIC COMMENTS TO AUTHORS**

This study is an experts consensus of ultrasound-guided injections for the treatment of spinal pain in China . The reviewer read this consensus carefully, and found this study is very interesting. In this study, the Wang et al described the purpose, significance, implementation methods, indications, contraindications, and techniques of ultrasound-guided injections. It gives us a practical reference point for physicians to implement ultrasound-guided injections in the treatment of chronic spinal pain. In my opinion, after a minor editing, it can be accepted for publication. Thank you very much.
