SPECIFIC COMMENTS TO AUTHORS

The commentary review succinctly puts forward a great future direction of research. I think this is coming at a great time when most of the world does not have access to anti virals. I agree with the commentary that RCTs in this field need to start forthwith. The paper requires a small amount of language polishing. But would definitely be a useful read especially to PCPs.

SPECIFIC COMMENTS TO AUTHORS

I could not see what the significant of the study. There have been several RCT, but the authors include only observational studies. (The RECOVERY Collaborative Group, others).

SPECIFIC COMMENTS TO AUTHORS

I recommend the manuscript be published. This opinion paper highlights that despite vaccines being essential for the control of epidemics, their use against COVID-19 proved to be inadequate to end the pandemic and must be considered incomplete.
