COMMENTS

COMMENTS TO AUTHORS:

A good attempt at rationalising the evidence.

COMMENTS

COMMENTS TO AUTHORS:

I have read with interest the manuscript entitled "Clinical prognostic factors for disabling Crohn's disease at diagnosis: a systematic review and meta-analysis". It is one of the first work searching the role of Crohn's disease in disability of the patient. The authors performed an extensive review of multiple manuscript related with the topic, the manuscript is very well prepared and written and can be accepted for publication.
