<input checked="" type="checkbox"/> Grade C (Good)	<input type="checkbox"/> Grade C: a great deal of language polishing	<input type="checkbox"/> No records	<input type="checkbox"/> Rejection
<input type="checkbox"/> Grade D (Fair)	<input type="checkbox"/> Grade D: rejected	<input type="checkbox"/> Existed	<input checked="" type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

COMMENTS TO AUTHORS

General Comments: The manuscript is interesting and the main importance of the research is represented by the help offered to clinicians and endoscopists in recognizing and treating a rare pathology that could be misdiagnosed as Inflammatory Bowel Disease. These series of children demonstrate the importance of cap polyposis in young patients. Manuscript is well presented and well written. Specific comments: Title: the title should be "Cap Polyposis: a Rare Cause of Rectal Bleeding in Children" Abstract: include incidence rate in adult Materials and Methods: include sentence "Informed consent was obtained by patients' parents Results: OK Discussion: OK References: Reference 1: include year of publication (1985) References 5-10: are the same, delete one References 6-15: are the same, delete one References 2-16: are the same, delete one References 17-19: are the same, delete one Table 2: eliminate Alb-Albumin, CRP- C-Reactive Protein, PR- per rectal because are not included in the table.

COMMENTS TO AUTHORS

1. What kind of recommendation can be given from these cases to the clinical doctors and pathophysiologists, thus to avoid the misdiagnosis of this disease? Especially how to tell the difference with IBD? 2. Misdiagnosis can cause wrong treatment. Any suggestion for the treatment protocol?

COMMENTS TO AUTHORS

It is difficult to know if this is rare or just under recognised condition, or both; comment on how this may be differentiated may help.

COMMENTS TO AUTHORS

The advantage of this article is the probably high number of endoscopy screened in the study interval. Please report the total number of pediatric patients undergoing an endoscopic investigation between 2000 and 2012 so that it is possible, and useful, to calculate the disease prevalence for a rare pathology.
