COMMENTS

COMMENTS TO AUTHORS:

Recurrent acute pancreatitis is not a defined concept for pancreatitis. It is either acute pancreatitis or chronic pancreatitis. You should clarify which criteria your diagnosis was based on.

COMMENTS

COMMENTS TO AUTHORS:

Pancreas divisum is a common congenital anomaly of the pancreatic duct and possible cause of recurrent pancreatitis and chronic pancreatitis. But, there are still controversies in clinical significance as a cause of pancreatitis. This study revealed recurrent acute pancreatitis is more common in divisum patients compared with those without divisum. The sample size was large to reach a conclusion and this results can help clinician understanding clinical significance of pancreas divisum. The imaging quality of presented figures were excellent and representative.
