COMMENTS TO AUTHORS

Mucocele of the appendix secondary to endometriosis is uncommon. The author reported a case and presented a short literature review. Both writing and figures are satisfactory. But there were more than 8 case reports with mucocele of the appendix due to endometriosis on my Pubmed search with key words "mucocele of appendix and endometriosis". Possibly, the authors did not count the cases of appendiceal mucocele secondary to endometriosis in some appendectomy case series with different pathology. The authors need to revise the literature review.
