## COMMENTS TO AUTHORS

Dear Dr. Lian-Sheng Ma, President and Company Editor-in-Chief World Journal of Gastroenterology

I have completed my peer review of the manuscript Manuscript number: ESPS Manuscript NO: 3581

Title: HBV endemicity in Mexico is associated to HBV genotype H and G, The geographical distribution in HBV genotype G and H infection in Mexico is summarized. However, I will point out some points that argument and explain should be added. Comment 1. The number of letters of abstract is over 200 characters of regulation. 2. In the last paragraph, which titled Molecular epidemiology of HBV/G in Mexico, there are several speculated documents, for example, submitted data or unpublished data. Authors should argue using the established information. 3. Reference 80-84 is missing in the main text.

**COMMENTS TO AUTHORS**

there not have enough evidence to support that HBV/G may have originated before the worldwide dissemination of HIV,
