[] Grade B (Very good)	[] Grade B: minor language polishing	[] Existed	[] High priority for publication
[] Grade C (Good)	[] Grade C: a great deal of language polishing	[] No records	[] Rejection
[] Grade D (Fair)	[] Grade D: rejected	[] Existed	[] Minor revision
[] Grade E (Poor)		[] No records	[] Major revision

COMMENTS TO AUTHORS

The manuscript well demonstrated the necessity of extended lymphadenectomy for gastric cancer patients without lymph node metastasis. In this study ,they found that the survival rate of node-negative patients with pT3 gastric cancer could be improved by D2 lymphadenectomy. Generally speaking,the paper is probably publishable, but should be reviewed again in revised form before it is accepted,as there are some minor points about your language.It needs careful editing by someone with expertise in technical English editing, paying particular attention to English grammar, spelling, and sentence structure so that the goals and results of the study are clear to the readers.
