COMMENTS TO AUTHORS

1. It is unclear what the purpose of this manuscript is. I cannot tell if it is an opinion piece / editorial, review article or what. I found the historical section interesting, though quite verbose. Please guide the reader early on in the manuscript in regards of what your purpose for the manuscript is. 2. You call this manuscript a "clinical observation" but I did not see much clinical observation. I saw a literature review with some opinion. 3. The focused discussion and opinion specific to C diff were well written and concise. 4. Figures were impressive and helpful
