COMMENTS TO AUTHORS

ESPS no.3837 Application value of multi-slice spiral computed tomography for imaging determination of metastatic lymph nodes of gastric cancer Chun-Lai Dai, Zhi-Gang Yang, Li-Ping Xue, Yu-Mei Li I have read with interest the article. In this article, Chun-Lai Dai et al try to evaluate the application value of multi-slice spiral computed tomography for imaging determination of metastatic lymph nodes of gastric cancer and to explore reasonable diagnostic criteria. As we know, MSCT has been used to conduct TM preoperative staging among many patients with gastric cancer in recent years. This article will be interesting for the rearder of the journal. No comments for the authors.

COMMENTS TO AUTHORS

I have read with great interest this manuscript entitled "Application value of multi-slice spiral computed tomography for imaging determination of metastatic lymph nodes of gastric cancer" by Dai et al. In this manuscript, Dai et al evaluated the application value of MSCT for imaging determination of metastatic lymph nodes of gastric cancer. The manuscript is very well written, and the data of the result were well described and discussed. The tables are clear. In my opinion, this manuscript can be published.

COMMENTS TO AUTHORS

This manuscript by Dai et al is well written. Only one minor suggestion: Are there some figures? If the authors can add some figures, it will be more interesting for the readers.
