COMMENTS TO AUTHORS

I assume this is an invited editorial and, if so, I think it is appropriate. There are several comments within this where the author doesn't refer to specific articles but says "the paper that discusses…". If I were a casual reader, I would want to know what the paper was so that I didn't have to go back and look at all the titles. Each of these should be highlighted. Otherwise it is good. The first paragraph is long, quite frankly kind of boring, and I am not sure it adds anything to the overall topic of what you are interested in. It is a general superficial review of pancreatitis, chronic pancreatitis, etc., that I am sure is covered in the articles involved. My suggestion would be to delete it.
