COMMENTS TO AUTHORS

This is a well written paper that reviews a topic that is often poorly understood. There are one or two typographical/grammatical errors but these will be corrected in the process of publication. One might question the relevance of figures 1 7 3 but without some figures the text would be a little 'dry'.

COMMENTS TO AUTHORS

The paper is well written and cover almost all the topic. The references are quite complete and updated as well. As minor remark among the causes of obstructive chronic pancreatitis it should be cited as one of the most frequent one the disruption of the pancreatic duct as a sequela of a severe acute panvcreatitis
