COMMENTS TO AUTHORS

This study reports the first case of malignant paraganglioma in the rectum of a 37 year old patient. In the study, the morphology and immunophenotype of the malignancy is well described and consistent with those of a typical paraganglioma. The study is properly conducted and described. The conclusions of the authors is supported by the data presented.

COMMENTS TO AUTHORS

-Your manuscript illustrating a case report of malignant paraganglioma occurring in the rectum is highly interesting one, however there are minor remarks that need your response: 1-Your abstract should include the well known items of the abstract that include: background, case presentation in summary, conclusion. 2-Minor language corrections are warranted such as: -In Discussion (page 6): other tumours may enter into differential diagnosis. -Page 7: there are increasing studies...etc, also have been founded
