COMMENTS TO AUTHORS

in this article, the authors have reviewed novel therapies for constipation. In this potential novel therapies have been identified as effective in management of chronic constipation. All the new treatment options have shown good safety profile. However, the authors need to provide full forms of some abbreviations like hERG, 5HT1B at least once in the article. Secondly, in almost all sentences full stop is before the reference numbers. It has to be given after the reference number. Thirdly, in some references last page numbers are missing like in reference 2, in reference no 3, names of authors are missing, reference no 4 is also incomplete, pattern of all the reference is different, author need to keep the pattern of references same.
