COMMENTS TO AUTHORS

Great succinct editorial. 2 more of a request than a review: 1- A schematic diagram for the procedure will be great for the readers 2- Table summarizing the dilemmas would another great addition

COMMENTS TO AUTHORS

It was a pleasure to review this paper. It is well written and is a very nice and updated review on the role of tibial nerve stimulation for fecal incontinence. I would only recommend to the author to report the published papers in 1 or 2 tables so that the readers can easily compare the results from the literature.
