COMMENTS TO AUTHORS

It seems to be a profound revision paper The english needs to be corrected The paper seems a bit too long in terms of extension Introduction Not adequate to refer "For example, Jianu CS presented ", not necessary. Clinicopathological significance Type I GNET 70%~80% of gastric GNETs are type I tumor. Don't use a number with percentage in the begining of a phrase. It needs a more profound revion of the other international series.
