<input type="checkbox"/> Grade E (Poor)	<input type="checkbox"/> Grade D: rejected	<input type="checkbox"/> Existed	<input type="checkbox"/> Major revision
		<input type="checkbox"/> No records	

### COMMENTS TO AUTHORS

The present study takes into consideration the conclusions of the latest meta-analysis and RCT concerning QoL of reconstruction types postgastrectomy. In my opinion not only summarizing studies' conclusions but giving also the level of Evidence and the degree of Recommendation for the QoL after reconstruction of each type of gastrectomy might be a useful argument for this study to be published.
