COMMENTS TO AUTHORS

The paper "Inflammatory Bowel Disease: Pathogenesis" from Yi Zhen ZHANG and Yong Yu LI is a well-written and comprehensive review in the field. My only suggestion is to add the recent paper titled "Inducible CYP2J2 and Its Product 11,12-EET Promotes Bacterial Phagocytosis: A Role for CYP2J2 Deficiency in the Pathogenesis of Crohn's Disease?", published in PLoS One (2013 Sep 13;8(9):e75107. doi: 10.1371/journal.pone.0075107). I think that this observation is worth mentioning here.

COMMENTS TO AUTHORS

Well described manuscript. The authors reviewed recent advances in the pathogenesis of IBD; especially in the individual's genetic susceptibility, the external environment, the intestinal microbial flora and the immune responses. The contents involves the recent data of the clinical researches and animal experiments. The reader of the WJG will read this paper, having an interest.
