## COMMENTS TO AUTHORS

My knowledge was poor in mitochondria and auto/mitophagy under condition of HCV infection. This review article is instructive and gives us enough knowledge. Then, this work has enough potential for publication in the present form, I think. Comment 1. There are some garbled characters.

### COMMENTS TO AUTHORS

This review article describes the auto/mitophagy mechanism and a relationship with hepatitis C virus infection. This article includes many new findings and very impressive. I found only several typing errors. Minor 1. Page3, line 2 from the bottom; "of the an internal" must be a mistake. 2. Page9, line11; the chemical name of superoxide was incorrect probably due to font. 3. Page13, line6; eIF2 alpha was incorrect probably due to font.
