COMMENTS TO AUTHORS

The authors described ITx vs HPN in IBD well. I'd like to suggest three points to improve the quality of the article. 1) ITx indications were particularize in Table 1. If possible, the actual rates (or something like numbers) should be added to give an overall picture. 2) The most important result of ITx or HPN should be clear with a table or figure. 3) The authors described data of North America and Europe. Some readers would like to learn about third world including Asia, South America, and Africa, even if there was few reports and literatures of it.

COMMENTS TO AUTHORS

1. It would be better if the authors add a table for complications of ITx and HPN. 2. Some abbreviations should be fully spelled when they appear first in the text.
