COMMENTS TO AUTHORS

1. I think the manuscript title is too long and does not explain the real detail that the authors would like to express correctly. 2. The information on the role of endoscopy in diagnosing and treating IBD is too descriptive. The authors should put the concept on the use of these endoscopies in their own words and explain more in technical detail, otherwise this is more like a review on what is going on in this field but no practical point to be noted by the readers. 3. Introduction part is too long and overlapping with following texts. 4. Minimal spelling errors.

COMMENTS TO AUTHORS

The review is well structured and discusses the importance of advanced endoscopists as members of teams that manages IBD patients. The subject is very important, since it may improve diagnosis and treatment in IBD patients. However, I have some comments that need to be taken into account in order to improve the manuscript. The comments are uploaded.
