<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> No records	<input checked="" type="checkbox"/> Major revision

COMMENTS TO AUTHORS

The paper is good although a bit too short for such a big and complex subject: may be the authors should add some more details and some tables summarizing the results of the most important phase III randomized controlled trials carried out in this important field of oncology

COMMENTS TO AUTHORS

This is a good review. It is worth having in the medical literature. However, to be publishable, it would need to be rewritten on a line by line basis to correct the English grammar. There are subtle mistakes and awkward phrases in about 30% of the sentences. This manuscript would be much improved if it was corrected by an editor or a collaborator who is fluent in English and has a medical background.

COMMENTS TO AUTHORS

Nice effort resuming a very tough topic. Changes have improved the paper. Perhaps more concrete data in the abstract would be nice
