COMMENTS TO AUTHORS

This is a well-written review paper on the importance of microRNAs in colorectal cancer. The topic is relevant, references up-to-date, the structure of the paper is logical. Comments: 1. the only comment is to please divide Table 1 into 2 Tables, the first showing the microRNAs that according to the available data may be of "major" importance and targets, and an additional data showing microRNAs for which targets and/or confirmation of its functional importance is less well investigated.
