COMMENTS TO AUTHORS

The manuscript entitled "Sonic hedgehog expression in a rat model of chronic pancreatitis" by Wang et al is very interesting. In the manuscript, the authors analyzed the activation of SHh signaling pathways in a rat model of chronic pancreatitis. The authors found that the SHh signaling pathway is aberrantly activated in rats with chronic pancreatitis. The SHh signaling pathway plays an important role in the development of chronic pancreatitis. Some minor revision suggested. 1 The manuscript should be format accord to the journal's style. 2 The discussion can be more deeper. 3 Please update the references. 4 Figure legend are missing.

COMMENTS TO AUTHORS

This is an interesting manuscript about rat model of chronic pancreatitis. Hedgehog signaling is a developmental signaling pathway that is highly activated in the embryo and in the early postnatal phase. In this, the authors analyzed the activation of SHh signaling pathways in a rat model of chronic pancreatitis. The results are informative, and well discussed. No comments to the authors

COMMENTS TO AUTHORS

Very interesting manuscript about the sonic hedgehog expression in rat model of chronic pancreatitis. It can be accepted for publication in WJG after minor corrections.
