## COMMENTS TO AUTHORS

Generally the authors have done a nice work. In this manuscript, the authors reviewed the literature about the proceedings of LT on HCC, CCA, LM and other rare tumors. From my side, the parts of HCC and CCA meet the main interesting current issues, therefore benefiting to form an easy understanding for the surgeons. But still, I have questions arising: 1, The Abstract and the Core tips have not been written well. More substantial information (such as up-to 7, neo-adjuvant...) should be included. I suggest the authors to rewritten them. 2, Some spelling errors exist throughout the manuscript (statistical, recommendations,...). Please check them very carefully.

### COMMENTS TO AUTHORS

The manuscript by Ravaioli. et al. entitled "Liver transplantation for hepatic tumors: a systematic review" is very impressive and well reviewed. It will be acceptable after the minor revision. 1. "the" is duplicated. "the" should be deleted in line2 of abstract. 2. In page 6 line 13, "statystical" should be changed to "statistical" 3. In the session of LT for cholangiocarcinoma, "yelded" should be changed to "yielded"?
