

## ESPS Peer-review Report

**Name of Journal:** World Journal of Gastroenterology

**ESPS Manuscript NO:** 6825

**Title:** Growth inhibition of hepatocellular carcinoma tumor endothelial cells by miR-204-3p and its underlying mechanism

**Reviewer code:** 00069966

**Science editor:** Cui, Xue-Mei

**Date sent for review:** 2013-10-30 08:55

**Date reviewed:** 2013-12-17 12:14

CLASSIFICATION	LANGUAGE EVALUATION	RECOMMENDATION	CONCLUSION
<input type="checkbox"/> Grade A (Excellent)	<input type="checkbox"/> Grade A: Priority Publishing	Google Search:	<input type="checkbox"/> Accept
<input type="checkbox"/> Grade B (Very good)	<input type="checkbox"/> Grade B: minor language polishing	<input type="checkbox"/> Existed	<input type="checkbox"/> High priority for publication
<input type="checkbox"/> Grade C (Good)	<input type="checkbox"/> Grade C: a great deal of language polishing	<input type="checkbox"/> No records	<input type="checkbox"/> Rejection
<input type="checkbox"/> Grade D (Fair)	<input type="checkbox"/> Grade D: rejected	<input type="checkbox"/> Existed	<input type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

## COMMENTS TO AUTHORS

The manuscript entitle " Growth inhibitor of hepatocellular carcinoma tumor endothelial cells by miR-204-3p and its underlining mechanism" by Shen et al. The content is worth for publicstion but the manuscript formats need to improve a lot to meet the journal formats before consideration for publication. Moreover, The figures legend need to make a great deal of language polishing before publication as follow: 1. Figure 2 contain only short title of figure. The authors have to give the details legend. 2. Figure 3 same as fig. 2 content only short title of figure, no details legend. Moreover, in the figure, the authors showed the same color of the graph represent for "HSEC" and "TEC" cell. 3. Figures 6,7,8 need details legend. 4. Figures 10,11,12 The details legend need to clarify.

## COMMENTS TO AUTHORS

1) This is research manuscript, not experimental report, by which the authors should write the results entirely in a way of paper. 2) The discussion in the current submission is far apart from the author's research, too much general description, but too small experimental relevant description, necessitating entire new description. 3) Result figures should be reorganized, currently just displaying the author's experimental results. The organization and editing of figures should be done to highlight the author's results. 4) Abstract might be too much redundant. Abstract is very important to make hypothesis and aim accompanied with highlighted results, after which conclusion should be set.
