<input type="checkbox"/> Grade D (Fair)	<input type="checkbox"/> Grade D: rejected	<input type="checkbox"/> Existed	<input type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

COMMENTS TO AUTHORS

Informative review and metaanalyses of relationship between Hepatitis B and ICC. Although the relationship is nothing new, the review gives a good breakdown, review and metaanalyses of recent evidence related to HBV and ICC.

COMMENTS TO AUTHORS

1. Factors tended to be associated with QTc prolongation due to hypomagnesemia, It is well known factor of long QT syndrome. And some factors (propranolol, hypokalemia) are not statistically significant. : No innovative result. 2. Patient number was very small: child C LC patient is only 2 person.

COMMENTS TO AUTHORS

Good revision, to accept The length is too much The text comenting other papers should be shorter Some pictures should be added (ERCP, biopsy)? A Table about the risk factors is missing A table for key-messages shoul be usefull at the ende of the paper
