COMMENTS TO AUTHORS

In this review, the authors reviewed and discussed the current knowledge regarding the production of different core gene products and their roles in viral pathogenesis, focused on the recent developments. This is very well written, comprehensive, and through review that would be quite useful for all readers of The Journal. There are very few issues to be addressed. Page 12. The authors may also discuss over reports by in vitro experiment on the biological effect of substitutions of amino acids 70 and 91.

COMMENTS TO AUTHORS

The review manuscript entitled "Production and pathogenicity of HCV core gene products" by Hui-Chun Li, Hsin-Chieh Ma, Chee-Hing Yang, Shih-Yen Lo is well-presented and written. The relevant literature was extensively reviewed. The subject is just timely.
