COMMENTS TO AUTHORS

In the manuscript entitled "Value of MR Diffusion Imaging in Hepatic Fibrosis and its Correlations with Serum Indices",the authors compared ADC values on DWI of hepatic fibrosis patients with those of healthy controls and identified its correlations with serum indices of liver fibrosis. This manuscript is very well written, some minor revision needed before publication.   1. The manuscript need some editing according to the journal's format. 2. Some minor language polishing should be revised. 3. The figures can be combined to one legend. 4. Discussion should be more focus on the topic. 5. References list should be updated.
